

CMOS 8-Bit Addressable Latch

High-Voltage Types (20-Volt Rating)

■ CD4099B 8-bit addressable latch is a serial-input, parallel-output storage register that can perform a variety of functions.

Data are inputted to a particular bit in the latch when that bit is addressed (by means of inputs A0, A1, A2) and when WRITE DISABLE is at a low level. When WRITE DISABLE is high, data entry is inhibited; however, all 8 outputs can be continuously read independent of WRITE DISABLE and address inputs.

A master RESET input is available, which resets all bits to a logic "0" level when RESET and WRITE DISABLE are at a high level. When RESET is at a high level, and WRITE DISABLE is at a low level, the latch acts as a 1-of-8 demultiplexer; the bit that is addressed has an active output which follows the data input, while all unaddressed bits are held to a logic "0" level.

The CD4099B types are supplied in 16-lead hermetic ceramic dual-in-line packages (F3A suffix), 16-lead plastic dual-in-line packages (E suffix), 16-lead small-outline packages (M, M96, MT, and NSR suffixes), and 16-lead thin shrink small-outline packages (PW and PWR suffixes).

Features:

- Serial data input
- Active parallel output
- Storage register capability
- Master clear
- Can function as demultiplexer
- Standardized, symmetrical output characteristics
- 100% tested for quiescent current at 20 V
- Maximum input current of 1 μ A at 18 V (full package-temperature range), 100 nA at 18 V and 25°C
- Noise margin (full package-temperature range) = 1 V at $V_{DD} = 5$ V, 2 V at $V_{DD} = 10$ V, 2.5 V at $V_{DD} = 15$ V
- 5-V, 10-V, and 15-V parametric ratings
- Meets all requirements of JEDEC Tentative Standard No. 13B, "Standard Specifications for Description of 'B' Series CMOS Devices"

MAXIMUM RATINGS, Absolute-Maximum Values:

| | |
|--|--|
| DC SUPPLY-VOLTAGE RANGE, (V_{DD}) | -0.5V to +20V |
| Voltages referenced to V_{SS} Terminal | |
| INPUT VOLTAGE RANGE, ALL INPUTS | -0.5V to $V_{DD} + 0.5$ V |
| DC POWER CURRENT, ANY ONE INPUT | ± 10 mA |
| POWER DISSIPATION PER PACKAGE (P_D): | |
| For $T_A = -55^\circ\text{C}$ to $+100^\circ\text{C}$ | 500mW |
| For $T_A = +100^\circ\text{C}$ to $+125^\circ\text{C}$ | Derate Linearly at 12mW/ $^\circ\text{C}$ to 200mW |
| DEVICE DISSIPATION PER OUTPUT TRANSISTOR | |
| FOR $T_A =$ FULL PACKAGE-TEMPERATURE RANGE (All Package Types) | 100mW |
| OPERATING-TEMPERATURE RANGE (T_A) | -55°C to $+125^\circ\text{C}$ |
| STORAGE TEMPERATURE RANGE (T_{stg}) | -65°C to $+150^\circ\text{C}$ |
| LEAD TEMPERATURE (DURING SOLDERING): | |
| At distance 1/16 \pm 1/32 inch (1.59 \pm 0.79mm) from case for 10s max | $+265^\circ\text{C}$ |

RECOMMENDED OPERATING CONDITIONS at $T_A = 25^\circ\text{C}$ (Unless otherwise specified)
 For maximum reliability, nominal operating conditions should be selected so that operation is always within the following ranges.

| CHARACTERISTIC | SEE FIG. 15* | V _{DD} (V) | LIMITS | | UNITS |
|--|--------------|---------------------|--------|------|-------|
| | | | MIN. | MAX. | |
| Supply Voltage Range: (At T_A = Full Package Temperature Range) | | | 3 | 18 | V |
| Minimum Pulse Width, t_W Data | 4 | 5 | 200 | — | ns |
| | | 10 | 100 | — | |
| | | 15 | 80 | — | |
| Address | 8 | 5 | 400 | — | ns |
| | | 10 | 200 | — | |
| | | 15 | 125 | — | |
| Reset | 5 | 5 | 150 | — | ns |
| | | 10 | 75 | — | |
| | | 15 | 50 | — | |
| Setup Time, t_S Data to WRITE DISABLE | 6 | 5 | 100 | — | ns |
| | | 10 | 50 | — | |
| | | 15 | 35 | — | |
| Hold Time, t_H Data to WRITE DISABLE | 7 | 5 | 150 | — | ns |
| | | 10 | 75 | — | |
| | | 15 | 50 | — | |

* Circled numbers refer to times indicated on master timing diagram.

Note: In addition to the above characteristics, a WRITE DISABLE ON time (the time that WRITE DISABLE is at a high level) must be observed during an address change for the total time that the external address lines A0, A1, and A2 are settling to a stable level, to prevent a wrong cell from being addressed (see Fig. 3).

Fig. 5 - A/D converter

92CL-2764

| MODE SELECTION | | | |
|----------------|---|---|----------------------|
| WD | R | ADDRESSED LATCH | UNADDRESSED LATCH |
| 0 | 0 | Follows Data | Holds Previous State |
| 0 | 1 | Follows Data (Active High 8-Channel Demultiplexer) | Reset to "0" |
| 1 | 0 | Holds Previous State | Reset to "0" |
| 1 | 1 | Reset to "0" | Reset to "0" |

WD = WRITE DISABLE

R = RESET

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to [TI's Terms of Sale](#) or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
